

Relationship Between Gold and other commodities and Oil Prices

By: Bashayer Ali Bin Muattih

Introduction:

The rises and falls in oil prices are usually accompanied by large changes in the gold price, and both oil and gold have an inverse relationship with the U.S. dollar in this project I am trying to answer

What is the Relationship Between Gold and other commodities and Oil Prices? And when energy prices and the price of energy-related commodities go down so do oil prices?

Scope:

This project using classification machine learning, using data from Kpasarc which contain 7 Column and over 230 rows will help to find the relation Between Gold and other commodity and Oil Prices.

Tools:

- Python
- Pandas
- NumPy
- Polty dash
